Standard Compact Utility Tractors

JOHN DEERE

When you buy a John Deere, you're getting the best of an entire company.

Although our equipment is impressive, many customers feel our most remarkable machine is actually our worldwide parts support network. Refined over 170 years, the system includes overnight delivery of most parts, John Deere trained technicians and a Dealer Technical Assistance Centre (DTAC) system that links every

John Deere dealership in the world to a constantly updated list of identified service issues and solutions. The evidence: A part that shows up on time, years of experience behind the tools of a technician and a machine ready when we said it would be. Every time.

There's power in numbers.

And John Deere now offers three compact utility tractors that put even more muscle on your side. The 20C and 25C are as powerful as they are compact, with impressive horsepower, easy gear access and wide operator stations. The 3036E adds hydrostatic trans-

mission, ergonomic design and a brawny front loader – features you won't typically find on standard tractors. At John Deere, we know you want the most for your money, so we've designed these tractors with power and affordability in mind.

Just register online and you can order parts from your John Deere dealer anytime, day or night at <http://www.JDParts.co.uk>*

There's never time for down time. John Deere is prepared to deliver any part, any place, any time. A Flash+ emergency order system runs 365 days a year, 24 hours a day during the season.

Every technician at a John Deere dealership is a true professional. Every one is required to complete an education programme that includes extensive communication and diagnostic system training.

20C/25C
Small Chassis
18.8 hp/24.1 hp
• Compact design
• Wide operator station
• 8x8 transmission
• High horsepower
• 600 kg 3-point lift capacity

3036E
Mid Chassis
37.1 hp
• Hydrostatic transmission
• Direct-injection engine
• Ergonomic design
• Custom-designed front loader

Features you need Performance you expect

Since a great tractor is the sum of its parts, we focused on perfecting the details when we designed the 20C and 25C Standard Compact Utility Tractors. While we're proud of the results, you should see them for yourself. So go ahead, climb onto the operator station to observe how we took your comfort into

consideration. Check out the ROPS to note why safety is a top priority. Start the engine to experience the difference a little extra horsepower can make. These are only a few of the features you'll appreciate on the 20C and 25C – and the rest are just as impressive.

Key Features

- High powered engines with 18.8 hp/24.1 hp
- Durable axles for added reliability

- Narrow compact design to boost versatility
- Faster ground speeds

Wide operator station and flat foot deck. Enjoy extra legroom and easy on/off access with a clean, ergonomic design.

8x8 gear transmission. Access levers easily for an enhanced driving experience – you'll love the added control and comfort.

Standard foldable mid-mount ROPS. Leave it up for safety or fold it down to get the clearance you need.

More horsepower. Increase ground speeds to get the job done faster and more efficiently thanks to a high performance engine.

Low noise and vibration. Since the engine and the operator station is rubber isolated, the noise level as well as the vibration is low.

High rear hitch lift capacity. With 600 kg lift capacity there is almost no limit to handle attachments.

You've never seen standard like this before.

Some rules were made to be broken. When we designed the John Deere 3036E Standard Compact Utility Tractor, we stretched the boundaries for what a standard tractor could be. We've added

high-end features like hydrostatic transmission, a powerful engine and an ergonomic operator station. All this at a surprisingly low price.

Key Features

- 37.1 horsepower engine
- Durable transmission and axles
- Hydrostatic transmission
- Easy to operate

Choice of tyres. Choose agricultural, industrial all-purpose or turf tyres to suit your needs.

Two-stage differential lock and brake. Gain traction and stability, even on rough terrain. When pushing down more, the brake will safely stop the tractor.

Ergonomic operator system. Levers and controls are within easy reach.

Hydrostatic transmission. Go a step beyond a gear transmission for ease of use.

Powerful engine. Speed through the working day with 36 horsepower.

Strong front axle. Tackle tough jobs without compromising safety – or your equipment.

Let us do the heavy lifting

With specially designed 305 Front Loaders, the John Deere 3036E Compact Utility Tractors are more versatile than ever before. The 531 kg lift capacity means you can handle all types of

landscaping tasks – clearing, moving, carrying and hoisting – without a hassle.

305 Loader Specifications

Loader Model	305
Tractor Model	3E Series
Maximum lift height at pivot pin	2162 mm
Reach at max. height	627 mm
Lift capacity at pivot pin (max. height)	531 kg
Breakout force at pivot pin	811 kg
Dump angle	45 deg.
Rollback angle	30 deg.
Loader raising time	2.78 sec
Loader lowering time	2.5 sec
Bucket dump time (regen)	1.5 sec
Bucket rollback time	1.55 sec

Versatile, easy, quick and precise

20C/25C

Plough. High traction combined with flexibility on speed makes this an easy task.

Tiller. Durability and high PTO power tackles all ground conditions.

Trailer. Transport jobs are easy to handle even in tight areas.

Flail Mower. Will cut through long tough grass.

Mower. A powerful mower for cutting weeds and grass.

Trailer. The perfect match for narrow stables.

3036E

Take all that horsepower and put it to work with our wide variety of attachments. We'll help you to get any job done well.

Cultivators. For easier ground preparation.

Loaders. Carrying material with this powerful 305 loader is an easy task.

Tiller. A hard working-unit to till medium sized areas.

Flail Mower. Highest cut quality and more manoeuvrability in small areas.

Wood Splitter. Helps you be more productive in tough jobs.

Sickle bar mower. Manages mowing even in tough conditions.
